

AMENDMENTS TO THE SPECIFICATION

Please replace Paragraph [0031] with the following paragraph rewritten in amendment format:

[0031] If control determines that the valet mode has not been initiated in step [[104]] 110, control sets a visual identifier in the cluster 66 that normal vehicle operation has been initiated in step 140. In step 142, all limited operational functions performed while in valet mode are returned to normal operational mode. In step 144, control displays the recordable data for the user. Control then loops to step 104.
